# A27 East of Lewes Update

**4 December 2020**

***A weekly bulletin with news and progress***

Looking towards Cophall roundabout (27 November 11.30am)

Looking towards Polegate junction (27 November 11.30am)

## Drainage works

We are currently improving the surface water drainage along the eastern edge of the carriageway between Cophall roundabout and Polegate junction. This is due to be completed by Easter 2021. This will reduce the risk of flooding.

During this time, we will also be upgrading the footpath and pedestrian access to improve safety for all users.

Overhanging branches and tree roots at risk of either causing an accident on the A27 or damaging pipes will be removed safely while traffic management is in place.

We know we are close to residential customers along the section of road between Cophall and Polegate junction while we carry out this essential work.

Noise monitors have been installed.

## Berwick roundabout

**Station Road will be closed from Monday 18 January 2021.**The closure will be between Pound Lane and the roundabout with Pound Lane as the diversion. This closure will be in place until late summer 2021.

COVID-19 legislation means that we must allow more space for each person to enable social distancing. We will be setting up welfare facilities to the south west of the roundabout. There will initially be a large number of vehicle movements to set up the compound. Within a few weeks, this number will be reduced.

We will keep you updated as our plans progress.

## Communications

This weekly update will be our main method of communicating important information with local residents including notifications of any night works and road closures.

If you would like to be added to our distribution list please send an email to a27eastoflewes@highwaysengland.co.uk asking to be added. You can ask to be removed at any time.

You can also get free text updates by **texting A27EoL to 60613** or you can call **Highways England on 0300 123 5000**
